Education

Anil Neerukonda Institute of Technology and Sciences

2022 – present

B.Tech - Computer Science and Engineering(AI and ML) - CGPA : 8.6

Visakhapatnam, Andhra Pradesh

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Machine Learning
- Software Methodology
- MERN Stack
- Database Management
- Operating Systems
- OOPS Concept

Experience

Anil Neerukonda Institute of Technology and Sciences (ANITS)

May 2025 – June 2025

Role - Full Stack Developer Intern

Visakhapatnam, Andhra Pradesh

- Built a full-stack Student Result Analysis Portal using React.js, Node.js, and MongoDB to visualize academic data across 8 semesters, including SGPA/CGPA trends, batch-wise pass percentages, and peer performance comparisons.
- Implemented secure role-based authentication (Student, Faculty) using JWT, with session persistence, protected routes, and encrypted credentials.
- Designed dynamic faculty and student dashboards with interactive charts (Recharts), real-time data access, and responsive layouts using Tailwind CSS.

EDUMOON

May 2024 – June 2024

Role - Front End Developer Intern

Visakhapatnam, Andhra Pradesh

- Led frontend development, resulting in a **25%** faster page load time and improved UX
- I built and maintained responsive, user-friendly web pages using HTML, CSS and JavaScript.
- I ensured HTML, CSS and JavaScript were clean and well-structured, adhering to industry standards for optimal performance and accessibility

Projects

BOOK RECOMMENDER SYSTEM | *Python, Streamlit, TensorFlow*

April 2025

- Built a personalized book recommendation system using collaborative filtering and popularity-based models
- Processed Book-Crossing dataset and implemented recommendation logic using NumPy and Pandas.
- Deployed interactive UI using Streamlit to explore top 50 books and get user-based suggestions.

Twitter Backend | *Node.js, Express.js, SQLite*

February 2025

- Built RESTful APIs to handle core user interactions such as tweeting, following users, fetching timelines, and retrieving user profiles, enabling a seamless social experience.
- Developed a robust user authentication system enabling secure signup, login, and protected API access using JWT (JSON Web Tokens).
- Integrated bcrypt for password hashing and implemented middleware for role-based access control and secure route protection.

Task Management | *HTML, CSS, JavaScript*

December 2024

- Built a dynamic task management app with a clean, user-friendly interface for adding, editing, and deleting tasks in real-time using HTML, CSS, and JavaScript.
- Implemented localStorage to persist user data across sessions without requiring a backend.
- Enhanced user productivity through responsive UI interactions and intuitive task organization features.

Technical Skills

Languages: Python, C++, JavaScript, HTML/CSS, SQL, MongoDB.

Frameworks/Libraries: React.js, Node.js

Tools/Platforms: VS Code, Google Colab, GitHub

Operating Systems: Linux

ACHIEVEMENTS

- Developed and delivered a responsive web page for a client, resulting in a satisfied client and earning 5000 for the project
- Secured 1st place in Error Epic coding challenge and 3rd place in Machine Learning Hackathon
- Secured 11th place in a DSA coding contest conducted by NxtWave, competing among 4200+ participants.
