Education

Anil Neerukonda Institute of Technology and Sciences

2022 – 2026

B.Tech in Computer Science and Engineering (AI and ML) — CGPA: 8.52

Visakhapatnam, Andhra Pradesh

Relevant Coursework

• Data Structures and Algorithms • Database Management Systems • Full Stack Development • Machine Learning

Projects

AI Resume Evaluator and Job Matcher 🚀 | *React.js, Node.js, Gemini API, PostgreSQL, TypeScript*

Oct 2025

- Built an AI-powered resume evaluation engine that matches resumes with job descriptions and delivers ATS-style improvement suggestions, increasing JD-resume alignment accuracy by **45%**.
- Implemented automated NLP pipelines to clean, tag, and structure resume data, ensuring high accuracy in candidate-job matching, reducing manual screening effort by **60%**.
- Developed an interactive Streamlit dashboard for real-time resume feedback and job ranking, improving user engagement.

Learning Path Generator with MCP 🚀 | *Python, Streamlit, APIs*

July 2025

- Built a Streamlit-based app that generates **personalized learning paths** using the Model Context Protocol (MCP), enabling adaptive goal-driven study plans.
- Integrated with **YouTube, Google Drive, and Notion** APIs to unify video learning, document storage, and note-taking.
- Implemented real-time progress tracking and an interactive UI, increasing engagement by an estimated **30%**.
- Configured secure API workflows using Google AI Studio API and Pipedream URLs for seamless connectivity.

Student Result Analysis Portal 🚀 | *React.js, Node.js, Express.js, MongoDB*

May 2025

- Developed a full-stack portal to visualize academic data (SGPA/CGPA, pass rates, batch trends), reducing manual analysis time by **40%**.
- Performed data cleaning, preprocessing, and validation using Python (Pandas)
- Created responsive dashboards using Recharts and Tailwind CSS for real-time analytics and insights.

Fruit and Vegetable Ordering System 🚀 | *React.js, Node.js, Express.js, SQL*

April 2025

- Built an admin dashboard to manage **100+** orders, update statuses, and control real-time inventory.
- Integrated JWT-based authentication and role-based access control, reducing unauthorized access by **95%**.
- Engineered dynamic order tracking and atomic SQL transactions, improving operational efficiency by **30%**.

Technical Skills

Languages: Python, C++, Java, JavaScript, HTML/CSS, SQL, MongoDB, Neo4j.

Frameworks/Libraries: React.js, TypeScript, Node.js, Nextjs, Express.js, NumPy, Pandas, Scikit-learn.

Data Skills: Data Cleaning, Data Tagging, Data Annotation, SQL Queries for Data Extraction and Transformation.

Soft Skills

Strong Analytical thinking and problem-solving
Proactive attitude and eagerness to take ownership of tasks
Strong attention to detail and data accuracy
Effective communication and teamwork

Achievements

- Secured **1st place** in the **Error Epic** coding challenge and **3rd place** in the Machine Learning Hackathon conducted as part of the national-level tech fest at ANITS.
- Achieved 11th place in a national-level DSA coding contest by NxtWave among 4200+ participants.
